

Positive result for exhibition

OFFSHORE ENERGY | With a total of 5,121 international visitors and 292 exhibiting companies sharing a floor space of 8,000m², the fourth edition of Offshore Energy in the Amsterdam RAI was a big success, according to organiser Navingo. The number of visitors in 2011 grew by 21% compared to the 2010 edition. For the first time, the exhibition was a two-day event this year.

Conference programme

Offshore Energy, which focuses on the international offshore, oil and gas and energy markets, is a dedicated offshore energy event that combines an extensive exhibition with a conference programme on the latest developments and markets in the offshore industry.

A broad range of subjects including global (renewable) energy demand and supply, drivers for investments and developments within the deepwater section were covered

in the following conferences, topical sessions and side events:

- ▶ Global energy outlook conference
 - ▶ Deepwater gas conference
 - ▶ Upstream innovation conference
 - ▶ Offshore wind topical session
 - ▶ Heavy lift topical session
 - ▶ Wave and tidal energy topical session
 - ▶ Deep sea mining topical session
 - ▶ Unconventional gas topical session
 - ▶ Decommissioning topical session
 - ▶ Drilling and wells cluster meeting.
- In total, 319 delegates participated in the conferences and sessions over the two days.

Call for papers

On October 23rd and 24th 2012, the fifth edition of Offshore Energy will take place at the Amsterdam RAI in the Netherlands. According to Navingo, the 2012 edition will have more exhibition space than the 2011 edition.

This year's exhibition Offshore Energy attracted more than 5,000 visitors

Liebherr celebrates 35th anniversary

NENZING/AUSTRIA | The construction machinery manufacturer Liebherr-Werk Nenzing GmbH recently celebrated its 35th anniversary. The festivities started with a ceremonial act attended by a large number

of international guests and information booths.

The company tour took guests through all production facilities, offering them insight into ultra-modern production technology.

The organiser is already looking for qualified speakers and professionals to share best practices and address current issues in the offshore energy industry in 2012. Suggestions of new topics are also welcome.

drilling applications at the company's new torque and drilling test stand.

Moreover, new developments in control and drive technology were presented in a special pavilion
